Gentlemen:

Could you call and see me on Tuesday afternoon or Wednesday with regard to the swinging cabinets? There seems to be a dislike to having them on all of the four sides of the column and I have worked out a plan to increase the number of swings on the sides already in use, by making larger top and bottom supports.

Mr. Truman L. Belden,
c/o Marine News Company,
26 Water Street,
New York.

My dear Mr. Belden:-

I have just heard from Henry Hayward, the
successor to the people who made the old swinging cranes
for decorations. The new proposition is as follows:-

To put five swings in each group where now
there are three. This would necessitate larger supports
top and bottom. We now have 24 swings. The new ar-
rangement would give us 40 swings, an increase of 16.
Also we would only use the same side of the columns
now in use, leaving the side facing into the room clear
as at present.

The price for the above mentioned work would be
\$875.00.

Hayward's figure for the old arrangement, namely
3 new groups containing each three swings was \$1,250.00.

Very truly yours,

Cumtler.

Gentlemen

We received to day sample lock for the cases we are making for you. We have bought and applied already the locks we need, and they are the same as the sample, but with different keys. We based our estimate on different keys, as in the trade the locks have different keys, and to masterkey the lock would involve an extra expense, besides the loss of time, as it would take at least 4 weeks to have it done.

Awaiting your kind reply to this

The cases you made for us arrived today
in apparently good condition.

We have a special exhibition here which
will continue until August 1st. If you desire to
install the bases for the cases at this time, the
work would have to be done before 10 o'clock. If,
however, you would rather wait until after August
